

PRODUCT DESCRIPTION

SECALFLOR Panels are a mix of various minerals, starches and cellulose fibres. They are made from 100% natural raw materials and, through their specifically engineered properties, support plant growth across a wide variety applications.

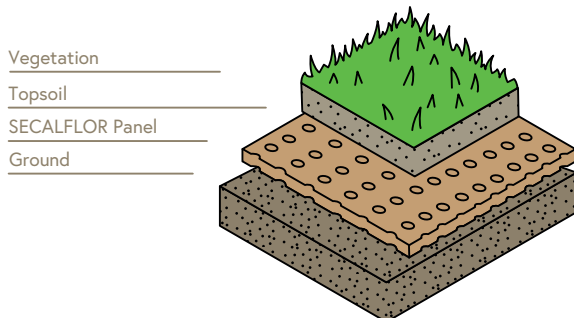

Thanks to SECALFLOR Panels' water-retention properties, vegetation can survive periods of heat and drought longer and grow more efficiently.

BENEFITS

SECALFLOR Panels are versatile and have outstanding features:

-  Sustainable
-  100% natural
-  Water retaining
-  Easy to use
-  No maintenance required
-  Improved plant growth
-  No artificial residues
-  Made in Germany and tested worldwide

DEPLOYMENT

APPLICATIONS

The SECALFLOR Panels have been tested and are in use in the following areas:

-  Intense and extensive green roofs
-  Planting and maintenance of parks and green spaces
-  Growing fruit and vegetables in arid areas
-  Erosion control, embankment greening and reclamation of contaminated ground (e.g. scrapyards)

SPECIFICATIONS

Length	79 cm
Width	58 cm
Height	2,5 cm (± 0.5 cm)
Dry weight	2 kg/m ² (± 0.5 kg)
Water absorption	up to 12 l/m ²

Other features:

- good drainage capacity
- can be stored indefinitely in dry conditions
- easy to cut to the required shape

TRANSPORT

EURO pallet with 60 m² (= 131 pieces)

Product suitable for use in Organic Farming in accordance with: Regulations (EC) No 834/2007 and 889/2008. Control ECOCERT SA F - 32600
